

## Tired of the “Bulges” that Exercise Alone Can’t Touch?

This amazing Laser-Like Lipo Technology can deliver effective results in just one treatment!

Unlike traditional liposuction, there is no pain, no bruising, no swelling, no drugs, and no downtime. In other words, **NO** side effects whatsoever!

It's safe, simple, and affordable, and just as relaxing as any spa treatment!

# Say Goodbye to Problem Areas and Hello to Fabulous!

## *What Are the Benefits of the Body Contouring Laser?*

It's non-surgical, non-invasive, safe, natural and pain-free. It has no side effects and effortlessly melts your fat. It is designed for FAT SPOT REDUCTION. You'll have no downtime and you can target specific spots that exercise and diet alone can't.

## *Is It Effective?*

This new technology has produced amazing results. Practitioners and patients report an average loss of 3 to 7 inches of abdominal girth. In our office we are getting even better results with patients losing 3 to 9 inches!

## *Is This Laser Treatment Safe?*

Yes, it is safe, non-invasive and painless. This breakthrough laser mimics the effects of exercise by stimulating the adipose cells to release their fatty contents. This technology specifically targets those fatty areas wherever they occur in the body.

## *What Areas Can Be Treated?*

Your waistline, abdomen, upper-, mid-, and lower-back, buttocks, thighs, and arms.

## *Who is a Good Candidate?*

If you have considered liposuction, but you don't want the risks, side effects and downtime, this is a great option for you. Or if you have love handles or a belly bulge that diet and exercise alone haven't been able to get rid of, you've come to the right place!

## *How Does This Work?*

The laser energy safely penetrates the skin targeting the fat cells. Once the cells are permeated, they release fatty acids, water and glycerol (also known as triglycerides.) The triglycerides are released from the fat cells and the body uses them as an energy source. The fat cells then "shrink" significantly resulting in inch loss.
