Female, Age 48

## Frequently Asked Questions about Our LipoLaser

### *Anatomically, where is the fat stored under the skin?*

Fat is usually stored in the subcutaneous layer and is located approximately 8mm below the surface of the skin.

### *How deep into tissue can a laser penetrate?*

The depth of penetration of laser light depends **on many parameters such as the laser's wavelength, power, type of device driver (pulse or continuous wave mode), and the technique used.** Our technology covers all these variables to produce the optimal effect.

### *Are there any side effects?*

No, LipoLaser is a safe and effective low-level laser device. However, the Laser must never be projected directly into the eyes.

## How to Ensure **Your Best** Results

- Drink PLENTY of water after every treatment.
- Do not eat 2 hours before or 2 hour after treatment.
- All visits should be 36-72 hours apart. **(So please don't miss your appointments!)**
- Incorporate Whole Body Vibration (WBV) post treatment for 10 minutes
- Ensure you undertake physical activity following each treatment to maximize your results.

## Thanks for Choosing Us!

If you ever have any questions during your treatment with us here at Club Reduce, feel free to call us! Make sure to ask about the other amazing nutrition, wellness, and weight loss programs we offer in our office!
