

"Excruciating Leg and Foot Pain is a Thing of the Past!"

*Advanced treatment is **finally** available to **YOU** if you are suffering from the debilitating effects of Peripheral Neuropathy Symptoms!*

Do you suffer from any of the following...

- ⇒ Numbness of your feet
- ⇒ Painful tingling feet
- ⇒ Night-time discomfort
- ⇒ Pin-like sensations with each step

Have you ever been told...

- ⇒ You have Neuropathy
- ⇒ Live with the pain, nothing can be done

If you answered **YES** to any of these questions, you're in **LUCK!**

"Doc, I can't live with this excruciating foot and leg pain!"

When you hear this from a patient it gets your attention. Typically, I get the worst of the worst pain patients but when I recently heard this exclamation, my attention was particularly peaked. Let's call this patient Bob. Bob is 62 years old with neuropathy in his hands and feet. He had poorly controlled Type II Diabetes and his life was literally as he described it "a living hell." Clearly he was coming to the end of his rope. The nerves in his legs and feet were damaged and he was in HORRIBLE CONSTANT PAIN!

I Can't Sleep at Night!

He complained to me, "I can't sleep at night because my **legs feel like they are being eaten by little bugs or chewed on by small animals.**"

During the day, he could hardly walk and every step sent shooting pain like lightning from his toes and up his legs up almost to his knees. He had **numbness** in his feet and **couldn't feel his feet very well** and had terrible balance problems. He was worried he might fall and injure himself.

I Had to Help This Man!

I recently was fortunate enough to accidentally discover **a new non-invasive and non-drug treatment for severe and constant foot and leg pain caused by neuropathy.**

I have been treating Neuropathy for years with great success but stumbled onto this new treatment in 2011 that is used to treat patients who are

fearful of losing their legs. My staff and I witnessed some amazing reductions and eliminations of some of the worst pain syndromes I had ever seen...

And it was FAST! After just a few minutes of treatment on patients with extreme and chronic pain of the worst kind, including neuropathy of the feet and legs, we had patients telling us how their pain levels had decreased and they were shocked. Some of them had their pain even alleviated after only one treatment. We were able to reduce or even eliminate neuropathy pain of the worst kind. Some of them had their pain even alleviated after only one treatment.

We were able to reduce or even eliminate neuropathy pain of the worst kind!

Using the latest and most recent technologies, I now offer a non-invasive, non surgical and painless neuropathy pain treatment. I help patients reduce or even eliminate their neuropathy pain using nutritional therapies, deep tissue super-pulsed cold laser treatments, combined with specific non-surgical, non-invasive, relaxing re-integration and stimulation treatments of peripheral nerves using whole body vibration to increase their function quickly.

So just how can you see if Dr. Singleton's Neuropathy Pain Relief treatment will help you to reduce or eliminate your foot or leg pain?

For a limited number of callers, we are now offering our unique 5-Point FREE Evaluation...

We have a very limited number of Free Evaluation times left, so call before they are gone!

Once you've been evaluated fully and completely with our very thorough Neuropathy Treatment Evaluation, we will know if you are a candidate for this new painless and effective Neuropathy Pain Relief Program.

Here's what some patients have said about their treatments:

"I was on 14 medications and my doctors had told me I may need to have my foot amputated. I hadn't been able to wear shoes other than sandals for years because of my swollen and painful feet. After going through this program I've lost weight and my foot pain is gone. I can now wear normal shoes."

Patient, N.S., Age 58

"I drove 120 miles to get this treatment because I had not been able to feel my feet for 15 years. I work on a farm and I would stumble and fall because I could not feel the ground under my feet. I'm getting older and I can't afford to fall and break something. After the treatments, I was able to feel my feet and toes again. Now for the first time in over a decade I have feelings in my feet." Patient M.H., Age 85

Be one of the first 25 callers and receive a FREE 5-Point Evaluation!

During your FREE evaluation

you will be checked for:

- ⇒ Foot and Leg Circulation
- ⇒ Nerve Sensitivity
- ⇒ Pain Fiber Receptors
- ⇒ Thermal Receptors
- ⇒ Pressure Receptors
