# There's a Hidden Danger in Your Makeup Bag...

Your current skincare regimen is doing more damage than you know.

From deadly UV rays to harmful air pollutants, your skin has enough to worry about.

We are lead to believe that purchasing high-dollar skincare products is the only way to protect ourselves from the damaging effects the environment can inflict on our bodies and our skin.

The truth is, most cosmetic and skincare products are full of dangerous toxins that can do more damage than good – including the designer label products!

**Step 1: Green Tea Cleanser** will leave the skin clean, soothed and moisturized. Studies show that green tea is effective in the prevention and treatment of abnormal skin conditions, such as acne, psoriasis and eczema. Green tea's antioxidant power protects the skin from environmental factors and free radicals that lead to premature aging of the skin. Combined in this superior wash are gentle emollients, vitamins, antibacterial properties, hydrators, and anti-inflammatory and UV protectors.

**Step 2: Apricot Exfoliator** is a grape seed oil based scrub that combines a perfect blend of vitamins, anti-oxidants, UV protectors, hydrators, moisturizers and collagen and elastin builders to provide superior protection and gentle exfoliation. Apricot Exfoliator contains natural alpha-hydroxy acid which gently exfoliates the skin to prevent the appearance of wrinkles and fine lines. Also contains powerful antioxidants that help diminish the sun's damaging effects and lessen free radical damage
