

## How is the test performed?

### Did you know that proper nutrition could help you with the following ailments?

- Depression
- Low energy
- Low libido
- Heartburn
- Allergies
- Insomnia
- Menstrual problems
- Hair loss
- Weight gain
- High blood pressure
- Anxiety
- Constipation
- Memory loss
- Dry skin
- Acne

This test is a non-invasive sensitivity screening. No uncomfortable scratch testing or injections are necessary!

#### The Procedure:

You will hold a small brass wand in one hand while our technician uses a stylus to touch various meridian points on your hands and feet. Each point represents a part of your body.

Using a highly sensitive ohmmeter, we'll take readings at specific meridian points to determine the functional state of your meridian pathways.

#### Report Findings:

Your report will provide you with valuable information about your current health status and nutritional needs.

## Sick & Tired of Feeling Sick & Tired? We Have Solutions!

Gain valuable information about your body's vital functions with a comprehensive **BioScan.**

# How Does the BioScan Work?

## BioScan

BioScan provides an extraordinary perspective on the state of your body's energetic health. If you've ever wanted to get a peek at what's really going on inside your body, this is your chance! With BioScan technology, you can see exactly how your organs, glands, and bodily systems are performing. You'll get a comprehensive look at how your body reacts to environmental toxins, stresses, emotions, and more!

The BioScan is a comprehensive test that measures the flow of energy along your meridian points. According to European medical research, acupuncture points are related to the body's major organs and systems. Major groups of these points are connected through channels called meridians. By carefully analyzing the energetic impulses flowing between these meridians, your practitioner will be able to access whether any of these pathways are blocked or restricted.

When your meridian pathways are blocked, you may experience weakness, illness, or chronic disease. The BioScan provides your healthcare practitioner with the feedback he or she needs to make nutritional recommendations that will strengthen and balance your body.

Unlike other tests available on the market, the BioScan is completely non-invasive. Without so much as a pinprick, the BioScan can provide you and your doctor with a comprehensive picture of the major systems & organs in your body. It creates a complete circuit (like an EEG or EKG) using a highly sensitive ohmmeter that measures the flow of energy between each meridian point and organ. This information is plotted on a graph that you and your doctor can use to develop a personalized nutritional plan that is suited to your specific needs.
