3-Week Lipo Laser Program

Welcome and Congratulations!

This is an important decision towards improving your wellness and overall lifestyle!

We share the mutual desire of you reaching all of your wellness goals involving the Lipo Laser. In order for you to reach these goals, we have provided a few points to educate you on achieving your best results. It is important to manage your expectations according to an appropriate diet, lifestyle and exercise program incorporated in conjunction with your Lipo Laser treatment protocol.

Ensure Your Best Results

- Drink plenty of water after every treatment.
- Do not eat 2 hours before or 2 hours after treatment.
- All visits should be 36-72 hours apart. (So please don't miss your appointments!)
- Incorporate Whole Body Vibration (WBV) post treatment for 10 minutes
- Incorporate Infrared Sauna post treatment for 20 minutes.
- Ensure you undertake physical activity following each treatment to maximize your results.
- Manage calorie intake; excess calories will counter act the Laser Treatments.
- Alcoholic beverages and high sugar content drinks must be avoided.
- Make sure to take all of your supplements outlined in the Daily Checklists, especially Cellulite Cleanse.

Information on the Lipo Laser

No Surgery No Pain No Downtime

The Lipo Laser enables all the efficacy of liposuction without the surgery, pain and long recovery time.

How it Works

- Laser energy safely penetrates patient's skin at a specific wavelength (658 nm) targeted for adipose (fat) cells.
- Adipose cells are permeated releasing free fatty acids (FFA's), water and glycerol. Together these compounds are also known as triglycerides.
- Triglycerides are normally released from fat cells when the body needs energy. Once released the glycerol the free fatty acids are used by the body as an energy source.
- Adipose cells "shrink" significantly resulting in inch loss for patients.
- Exercise or a 10 minute whole body vibration session is recommended immediately post Lipo Laser treatment to burn FFA's within the body and help stimulate the lymphatic system.
- A 20 minute session in the infrared sauna further stimulates the lymphatic for ultimate detoxification resulting in permanent inch loss.

What is the protocol?

The recommended treatment protocol for the Lipo Laser is **3 treatments weekly for 3 weeks**. The treatment time can vary from 40-50 minutes per session. However, treatments may continue longer as needed to achieve desired results. A standard 40 minute procedure releases 40-60 grams of fat. The Lipo Laser mobilizes fatty acids and works synergistically with the body's natural weight loss mechanisms.

Why is the technique termed as Low Level Laser?

The reason why the technique is termed "Low-Level" is that the optimum levels of energy density delivered are low when compared to other forms of laser therapy as practiced for ablation, cutting, and thermally coagulating tissue. In general, the power densities used for Low Level Laser Therapy are lower than those needed to produce heating of tissue, i.e., less than 100 mW/cm², depending on wavelength and tissue type.

Is laser (LLLT) therapy scientifically documented?

There are thousands of published studies that describe the positive effects of laser therapy. These studies range from studies on individual cell types to "in vivo" double blind crossover studies. The areas of study range from wound healing to Musculo-skeletal conditions and have been conducted on different types of laser devices. Medline is a very good database search engine that can provide abstracts and can sell literature. There are also many books on the subject.

How deep into tissue can a laser penetrate?

The depth of penetration of laser light depends on many parameters such as the laser's wavelength, power, type of device driver (pulse or continuous wave mode), and the technique used. Our technology covers all these variables to produce the optimal effect.

Does LLLT emit heat?

Low Level Laser Therapy is a light source treatment that generates light of a single wavelength. Low Level Laser Therapy emits no heat, sound, or vibration. Instead of producing a thermal effect, Low Level Laser Therapy acts via nonthermal or photochemical reactions in the cells, also referred to as photobiological or biostimulatory.

What happens when LLLT hits the subcutaneous fatty tissue (adipocytes)?

A low-power laser of the semiconductor Diode type, with a 658-nm wavelength, is able to disrupt the external membrane of the fat cell, inducing lipolysis. After 4 minutes of laser exposure, 80% of the fat is released from the adipose cells; at 6 minutes of laser exposure, 99% of the fat is released from the adipocyte. The released fat is then collected in the interstitial space.

What is released when an adipocyte is irradiated with Low Level Laser?

Water, Glycerol and Free Fatty Acid (FFA).

What are Free Fatty Acids and Glycerol?

Free Fatty Acids are the byproducts when an adipocyte is broken and comparable to one of the outcomes of the food digestion process. These acids are described as "Free" because they can be transported in the bloodstream without the aid of any other carriers. Triglyceride is a term that describes a collection of three Fatty Acid molecules bound together with one Glycerol molecule. Each Fatty Acid molecule is an extended chain of carbon and hydrogen atoms. The process of hydrolysis separates the stored fats into its two separate compounds, Fatty Acids and Glycerol. Glycerol has properties similar to alcohol and sugar; after the release by the adipose tissue, the Glycerol is passed through the bloodstream and returned to the liver for a conversion into a useful energy source - Glucose.

What is the average amount of water, Glycerol and free fatty acid released in a Low Level Laser session?

The average fluid release from the fat cells (for each molecule of triglyceride mobilized) is 1 molecule of Glycerol and 3 molecules of Fatty Acids.

Anatomically, where is the fat stored under the skin?

Fat is usually stored in the subcutaneous layer and is located approximately 8mm below the surface of the skin.

How much fat is released from a Lipo Laser treatment?

A standard treatment will release about 40–60 grams of fat per treatment.

If fat is released in 6 minutes, then why is the treatment for 10 minutes?

After the initial hydrolysis, some of the Fatty Acids will be reesterified and return to the 'triglyceride pool' without ever leaving the adipose tissue cell. So, continued Low Level Laser irradiation is needed.

Where do the Free Fatty Acids go?

Once the Free Fatty Acid leaves the cell, it enters the interstitial space. It is then absorbed by the lymphatic system, bound to the albumin, transported via afferent lymph vessels to the sentinel node, broken down via lipases, and dumped into the circulatory system where the debris can then be processed by the liver (Fatty Acid Oxidation). Some of the Free Fatty Acids are converted to triglycerides in the liver and returned to the plasma. The rate of turnover and metabolic disappearance of Fatty Acids from the plasma is known to be extremely rapid as their half-life in the plasma is about 1½-2½ minutes. Free Fatty Acids combine with Oxygen to produce energy. The Free Fatty Acids released from adipose tissue can be utilized anywhere there is energy needed within the body. The ultimate destination of the released Fatty Acid is to the mitochondria of the subject's cells that require energy. The Mitochondria is the powerhouse of every cell.

Where does the Glycerol go?

The liberated Glycerol is not utilized again for triglyceride synthesis, can diffuse rapidly into the blood and once passed into circulation undergoes a dilution process. Glycerol will diffuse widely and rapidly throughout the total body water, disappears from the blood stream and appears in urine. The rate of turnover (and the metabolic disappearance of Glycerol from the plasma) is estimated to be about 30 minutes. Glycerol is hence rapidly excreted in the urine. Additionally, after being released from the adipose tissue, Glycerol is passed through the bloodstream for return to the liver for conversion into a useful energy source - Glucose.

Are there any side effects?

No, our Lipo Lasers are a safe and effective low-level laser device. However, the Laser must never be projected directly into the eyes.

Are there any contraindications?

A physician should be consulted before using the Lipo Laser if the client has any of the following: Pregnancy, Epilepsy, Immuno-suppressive disorders, Thyroid Gland Dysfunction, Uncontrolled Hypertension, Pacemakers, Cancer, Heart Disease or Cardiac Arrhythmias, Liver or Kidney Disorders. The Lipo Laser is not recommended for anyone under the age of 18.

What is the protocol to utilize Glycerol and Free Fatty Acids after my Lipo Laser treatment?

Our after-treatment protocols recommend the use of the Whole Body Vibration machine to effectively utilize Free Fatty Acids and Glycerol, in addition to initiating the mechanism of lymphatic processes.

What does post vibration platform exercise do?

The underlying mechanism with whole body vibration is elicitation of muscular activity. The effects include increased blood flow, oxygenation and heat with release of hormone responses comparable to that found after resistance type exercise.

Vibration exercise elicits a mild cardiovascular activity, and muscular mechanisms of fatigue, requiring energy. While fat, in the form of Fatty Acids, is a very desirable energy source, it is dependent on the presence of oxygen to be useful.

Whole Body Vibration acts in two ways:

(a) Stimulates muscles, which creates the need for energy. Free Fatty Acids are released by the Lipo Laser which combine with oxygen and produce the energy needed for these muscles.

(b) In circumstances where the energy is required by the body more quickly than oxygen can be delivered to the required location, the body will switch to its less energy efficient anaerobic system. When the body is using one of its anaerobic energy systems, it cannot utilize Free Fatty Acids, but it will simply generate less energy with a resulting greater depletion rate of glucose. This glucose is obtained from the released Glycerol and its conversion in the liver.

A total length of 10 min on the Whole Body Vibration (exercise application) is equivalent to length and intensity of training stimulus that can be reached by performing 150 times leg press or half squat exercises with extra loads of 3 body mass twice a week for 5 weeks.

How many calories are burned in a 10 min session on the Whole Body Vibration at levels 1, 2 and 3?

A 10 minute Whole Body Vibration session could yield significant calorie loss. This could increase with intensifying the activity while on the machine. Note: It has been calculated that 10 minutes on the K1 Whole Body Vibration machine would be similar to approximately a 6-10 km walk (3-6 miles). Since 1 gram of fat has 9 calories, and a single Lipo Laser session releases approximately 40 gms of fat, and will require approximately 360 calories to burn the fat released.

How does the sauna help in this treatment?

Weight Control

As our body expends energy to produce sweat (1 gm sweat requires 0.586 kcal) a moderately conditioned person can easily sweat off up to 1000 gms or more in a sauna session - **the equivalent to running 10-15 kms (6-9 miles)**. While this weight loss can be regained by re-hydration with water, the calories consumed will not. This is a valuable system for those who don't exercise and those who cannot exercise, yet want **an effective weight control and fitness program**, along with the benefits that regular exercise brings.

How Does It Benefit Us?

Because infrared rays penetrate the body over 1-1/2 inches throughout conversion, there is a deep heating effect in the muscle tissues and internal organs without giving too much burden to our heart.

Our body reacts to the increased heating through the **natural cooling process of perspiring**. Through the perspiration process, **acid and waste residue** like toxins, sodium, alcohol, nicotine, cholesterol and the potentially carcinogenic heavy metals **are removed from the cells** (especially zinc, lead, nickel, cadmium, etc). Also, the pores of our skin open and discharge waste products, the skin sheds any old skin cells, leaving it glowing and immaculately clean, with improved tone, elasticity, texture and color. The deep penetrating heat also stimulates the heart to send more blood to the body cells to increase blood circulation, which improves many symptoms.

What Is Infrared?

Infrared is the band of light we perceive as heat. We cannot see this band of light with the naked eye, but we can feel this type of light in the form of heat. Our sun produces most of its energy output in the infrared segment of the spectrum. Infrared rays heat your body without having to heat the air in-between, through a process called **conversion**.

The infrared is divided into 3 segments by wavelengths, measured in microns; 0.76-1.5 microns-near; 1.5-5.6 microns-middle; 5.6-1000 microns-far infrared. Among these segments, only far infrared penetrates organic substances such as the human body two to three inches so that the warming effect is very uniform.

How Safe Is It?

Because infrared is part of the sunlight, it's completely safe to use. Health professionals have used red infrared heat lamps for decades to **treat muscle and joint problems**. In hospital baby care units, incubators are often equipped with infrared heating systems to **keep newborn babies warm**.

FOOD LIST

The amount of vegetables consumed on the Herbalogica program is unlimited. Use the list below for successful eating.

- Vegetables may be steamed for four minutes or stir fried over low heat; however, for *best results*, *½ of vegetable intake should be raw*.
- Vegetable intake should be twice the amount of fruit intake.
- Use organic whenever possible, frozen is okay, no dried or canned fruits and vegetables.
- Fresh juices made from vegetables and juices are allowed.
- Standard serving size is *½ cup*.
- Fresh herbs and spices may be used. Organic dried spices may be used as long as they are not expired or old.

Vegetables (Always best eaten raw, but if you must cook, lightly steam them)

Artichokes	Eggplant	Pimentos
Alfalfa sprouts	Fennel	Radish
Asparagus	Garlic	Rhubarb
Bamboo shoots	Green Beans	Rutabaga
Bean sprouts	Green Onions	Shallots
Beets	Jicama	Snap Beans (Edible Pods)
Bok Choy	Kohlrabi	Snow Peas (Sugar Peas)
Broccoli	Lima Beans	String Beans
Brussels sprouts	Leek	Sprouts
Buckwheat sprouts	Mung Bean Sprouts	Sunflower Sprouts
Cabbage, Chinese	Okra	Tomatillos
Cabbage, Red	Olives	Tomatoes
Carrots	Onion	Turnips
Cauliflower	Parsley	Water Chestnuts
Celery	Parsnips	Wheat Grass
Chard	Peas	Zucchini
Chives	Pepper, Green	
Cucumber	Pepper, Red	

Lettuce and Greens

Arugula	Dandelion Greens	Oakleaf
Beet Greens	Endive	Radicchio
Belgian endive	Endigia (Red Endive)	Red Leaf
Bib lettuce	Escarole	Romaine
Boston lettuce	Green Leaf	Spinach
Butter Lettuce	Iceberg	Swiss chard
Cress	Kale	Watercress
Collard Greens	Mesclun	
Curly Endive	Mustard Greens	

Fruits

Apples	Grapefruit	Papaya
Apricots	Grapes	Peaches
Avocados	Guava	Pears
Bananas	Honeydew	Persimmon
Blackberries	Kiwi	Pineapple
Blueberries	Lemon	Plums
Boysenberries	Limes	Pomegranate
Cantaloupe	Mango	Raspberries
Cherries	Melons	Strawberries
Coconut (no dried)	Mulberries	Tangelos
Dates	Nectarines	Tangerines
Figs	Oranges	Watermelon

Approved Oils: (Serving size 1 TBSP. if used for dressing, 1tsp for stir fry) use as needed

Coconut Oil – (A great substitute for Butter!)

Extra-virgin olive oil

Flaxseed Oil – (Great for dressings. Keep refrigerated, do not heat)

Grape seed oil

*Use cold-pressed and unprocessed

Salt and Spices:

Salt – Real Salt or Celtic Sea Salt

Fresh herbs and spices may be used. Organic dried spices may be used as long as they are not expired or old.

Juices:

Fresh Vegetable Juices

Dairy:

Organic Butter - occasionally

Water:

Distilled Water (Use during lemonade detox)

Filtered Water

Purified Water

Spring Water

*Remember to drink a minimum of half your body weight in ounces

_____ (body weight)/2=_____ounces of water intake a day

AVOID GROUP:

Alcohol, Caffeine, tobacco or other stimulants

All Coffee and tea (including herbal)

All Dairy – All hard cheese are made from mold (Organic butter is the only exception)

All sugars including: refined sugar, fructose, corn syrup, honey, molasses, date sugar and maple sugar.
(Maple syrup is allowed on detox days)

All white flour and white flour products.
All pastries, bread, crackers, pastas, etc.
Mixed seasonings and spice rubs like Mrs. Dash etc.

All Grains

All Meat

Processed or Refined Foods

Yeast or products containing yeast
Refined White Flour
Refined White Sugar

MSG or Chemicals

Starchy Vegetables:

Hominy
White Rice
Yams
Potatoes
Corn
Dried Beans

DETOXIFICATION

The Herbalogica Company and Dr. Todd Singleton are committed to your health, vitality and appearance. We continue to research and develop products and programs that offer total body wellness.

Because of the need for individuals to regularly rid their bodies of accumulated toxins and waste materials, Beneficial International, the parent company of Herbalogica, has spent many years in the development and perfection of the ultimate detoxification and body cleansing program. Designed with the aid and interaction of physicians, nutritionists, and herbalists, the Herbalogica Detoxification Program has helped thousands of people in their quest for health and vitality.

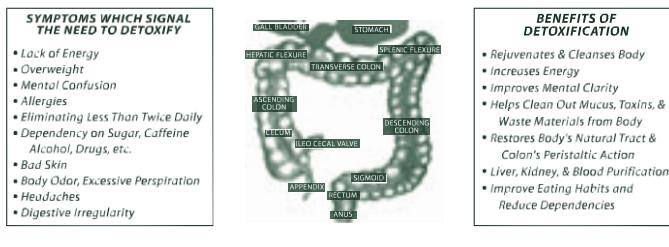

Detoxification is one of the most important factors in the promotion of good health and disease prevention. The Herbalogica Program helps the body to cleanse itself of toxins, mucus and other waste materials in the intestinal tract and major vital organs, improving the way they function. This not only restores new energy to the vital organs, but to the entire body as well.

Herbalogica offers one of the original Detoxification Programs. Our natural formulas have been in use since 1979 – long before detoxification was a popular concept. This history gives you confidence that you are using a program that is safe and effective.

Detoxification can be part of a health maintenance and prevention program when used 3 to 4 times per year. Though it is not a “cure-all”, it is a positive way to start addressing many undesirable body conditions, such as allergies, acne, arthritis, skin problems, cellulite, obesity, etc.

Benefits of Detoxification:

- An increase in energy is experienced.
- The digestive tract can rid itself of accumulated waste and putrefied bacteria. (Typical loss is between 2-8 lbs. of water and waste during a 3 day cleanse.)
- Liver, kidneys and blood are purified and function more effectively.
- The peristaltic action of the colon is strengthened.
- A mental clarity occurs that is not possible under the constant bombardment of chemicals and food additives.
- Physical dependency on habit-forming substances such as refined sugar, caffeine, nicotine, alcohol and drugs is greatly diminished.
- Bad eating habits are broken. As you come off the program, it is easier to make wiser food choices.
- The stomach has a chance to return to normal size, making it easier to control the quantity of food eaten.

TYPICAL (UNHEALTHY) COLONS

HEALING CRISIS

The body has natural cleansing abilities that help to expel unnecessary or harmful substances. Four eliminative organs of the body are: the bowels, the skin, the lungs, and the kidneys. These systems are in use all the time, working to keep the body clean and healthy.

When an invader enters the body, the natural process is for the body to remove that invader through eliminative organs. This can happen through diarrhea, vomiting, perspiration (fever), coughing, mucus, or nasal discharge. These natural healing abilities are often under used, as the common response to illness or discomfort is to take chemical medications for symptom relief. We suppress the body's natural eliminative processes through anti-diarrhea drugs, antihistamines, fever reducers, antibiotics and others to keep our bodies from cleansing in the natural way. The "stuffing drugs" that we use drive the virus and bacteria back into the tissues where it can remain until the next immune system crash. Immediate symptoms are managed, but long-term health problems are often the result. For instance, a steroid (cortisone) ointment used for a skin condition may clear up immediate symptoms, but later a more serious problem may occur, such as asthma. In turn, bronchodilators may control the asthma, but may cause depression. In the effort to relieve a patient's symptoms, the real causes of the patient's condition have been overlooked. In addition to environmental toxins and the unhealthy foods that we consume, these types of chemical stuffers contribute to our need to detoxify regularly. A cleansing process such as Detoxification takes these substances out of storage and into circulation to be eliminated. This occasionally causes unpleasant symptoms for a short time. The consumption of caffeine, refined sugar, alcohol and other substances also contributes to the effect that is known as a "healing crisis."

During detoxification and the days following, many people experience some of the signs of a healing crisis, which may include: headaches, skin breakouts, bowel sluggishness, diarrhea, fatigue, sweating, frequent urination, congestion, nasal discharge, or body aches. A few may also briefly experience anxiety, irritability or mental depression.

You must understand that your body is going through cleansing and detoxification. It is throwing out poisons using the energy it has saved from the hard-to-digest meals that have been discontinued. This is your body's natural way of cleansing, and is a positive occurrence.

The best way to encourage your body's natural cleansing methods is to not use over the counter drugs to stop the cleansing process. (Prescription medication should NOT be discontinued without a medical doctor's approval). They may make you feel better in the short term, but to do so by driving toxins back into the tissues. Drink plenty of water to facilitate the process and get some rest.

The healing crisis generally lasts from just a few hours to a few days. The healthier one's body is to begin with, the fewer symptoms there will be. The more the body has to clean up, the harder and longer the cleansing side effects will be. Symptoms will also be more pronounced if the change in the diet is abrupt, and less so if it is gradual. This is why detoxification preparation days are so important. Each healing crisis is followed by increased vitality and improved wellbeing.

Please be aware that it is just as important for your body to come off detoxification correctly as it is to detoxify. Your body is in a cleansing mode and will continue until clogging foods are reintroduced. As you finish Detoxification, continue taking the herbs until they are gone. Many of the ill-feeling symptoms that you may have been experiencing will have already begun to disappear. In fact, the three

day cleanse is pretty dramatic. You will have lost 2-8 pounds, and will have begun eliminating some of the 5-27 pounds of waste that are being stored in the colon. If you are on medication, ask your prescribing doctor to work with you as you go through this program. Start consuming fresh fruit, salads and vegetables. Some people choose to juice live foods for a few days before eating solid foods, allowing the body more time and energy to heal and gain strength. Slowly work your way back into foods after detoxification. Your body is now clean and will no longer tolerate abuse. A couple of beers will make you drunk, and you may become ill after eating pizza, and a candy bar may give you a headache. All these foods are very unhealthy and your clean body is simply more sensitive to toxins.

Contact your Health Care Practitioner for specific questions on Healing Crisis.

Detoxification is a wonderful way to begin a healthy lifestyle. Done 3-4 times per year, the body is stronger, cleanser, and better able to resist illness.

FREQUENTLY ASKED QUESTIONS ABOUT DETOXIFICATION

Will the lemon juice mixture cause too much acid for my sensitive stomach? Although the lemon is an acidic fruit, it turns alkaline as it is digested and aids in attaining a proper pH balance within the body.

Is detoxification safe? Absolutely. Body cleansing for health is a concept that has been in use for thousands of years. This type of internal cleanse has been used safely for periods of up to 2 months over the last 30 years. Herbalogica recommends detoxification for 3-10 days only, 3 to 4 times per year. See you Health Care Practitioner for specific directions.

Can I detoxify if I have hypoglycemia? Detoxifying is especially beneficial to those with hypoglycemia. Just be sure to use only pure maple syrup in the lemon juice mixture. Honey or other sweeteners will trigger an unhealthy insulin response. Herbalogica APPETITE APPEASER will also help to regulate blood sugar levels.

How does detoxification affect cellulite? Cellulite is waste materials trapped in connective tissue and fat cells, and it is very resistant to ordinary dieting and exercise. While Detoxification will not remove cellulite, it does cleanse the intestinal tract and the body's liquid waste system, thereby speeding up the elimination of toxins from the body, which aids in cellulite removal. Improved results can be achieved when done in conjunction with Herbalogica Body Contouring Wraps.

Will I have energy during the cleanse? As toxins are expelled from the system, the energy levels rise. It may take a day or two for this effect to occur. If you are not as energetic as you feel you should be, add a little more maple syrup to the lemon juice mixture to raise and maintain your blood sugar level. It is also helpful to make the mixture last throughout the day rather than drinking it all at once. Herbalogica recommends reducing physical activity on detoxification days.

Why is it important to use distilled water? Distilled water is pure, which means it has no chemicals or bacteria to interfere with the cleansing process. We recommend continuing to use distilled and /or pure spring water after your cleansing program. Do not use bottled mineral water since it may contain concentrations of heavy metals. Soft water is also a poor choice because of its high sodium content.

Will I suffer hunger pains during detoxification? Yes, you might and if you do, simply drink the lemon juice mixture more often. Since this mixture is food already in liquid form, it gets into the bloodstream faster and allays hunger. You might think you are hungry because you aren't chewing food, but with the mixture you are getting the nutrients you need.

Why is it important to use pure maple syrup? First, pure maple syrup contains many minerals and vitamins. For this reason, it will provide the body with energy. Second, pure maple syrup is a balanced, natural sweetener and can be used without causing an insulin response. Because of this, hypoglycemics can use the program without fear of lowering or raising blood sugar levels.

Won't the lemon juice mixture cause too much acid for my sensitive stomach? No. Even though lemon is an acid fruit, it turns alkaline as it is digested and aids in attaining a proper pH balance.

SUPPLEMENTS INCLUDED IN THE 3-WEEK LIPO LASER PROGRAM

ANTI CELLULITE LOTION

MAINTAIN anti-cellulite lotion should be applied immediately after showering or bathing, on all days in between body wraps. May also be used as an everyday circulation lotion as well. Apply to dry skin in a circular motion, treating the problem areas of the hips, buttocks, thighs, upper arms, etc.

APPETITE APPEASER

Helps to appease the appetite naturally and lessen nervous tension while dieting. This blend of 11 natural herbs also works together to assist the body in breaking down and dissipating excess fat from around the heart and other vital organs. It also produces the “fat burning” enzymes, and increases energy levels naturally.

BODY PURIFIER

A combination of 11 herbs that work together to help rid the liver, kidneys, and bowels of accumulated toxins and other waste materials. Helps to purify the blood stream and cleanse the lymphatic system.

CELLULITE CLEANSE

Stimulates the circulatory system and the lymphatic system to pick up all stored water retention, toxins and waste materials (main contributors to cellulite) harboring in the connective tissues. It then promotes the elimination function for these unwanted substances.

EXERCISE GEL

Get the most out of your workout with Exercise Gel. When applied before exercising, this innovative gel warms muscles and increases circulation. Typically, fatty tissues have less circulation, making these areas more difficult to target. HEAT draws blood to those areas, helping you get maximum results from every workout.

FIBER BLEND

This excellent source of fiber is essential in the fight against obesity. By speeding up the body's food processing time, the important vitamins, minerals, and other nutrients are absorbed from the food. This helps to maximize the body's efficiency without calories. This formula also helps lower cholesterol levels in the blood, cleanses the intestinal tract, and combats constipation.

NUTRITIONAL SHAKE

An all-natural, 180-calorie, sugar free balanced meal, for healthy weight loss and blood sugar management. This shake easily mixes with water and is available in chocolate, vanilla, strawberry, and orange cream.

INTESTINAL CLEANSER

This formula is a superb combination of 9 herbs that have an extremely beneficial effect on the entire intestinal tract. It is also a bowel tonic and rebuilding formula. It helps improve intestinal absorption of vital nutrients while decreasing the absorption of toxins.

MULTIVITAMIN/MINERAL

Two capsules per day provide 100% RDA of all essential vitamins and minerals. The only way to lose weight permanently, and maintain a well functioning body, is to get 100% nutrition in your diet. Multivitamin/mineral is a great way to get them all into your diet.

VITAMIN D

This easily absorbed liquid gel form of Vitamin D boosts the immune system and helps the body absorb more nutrients. When the body absorbs the proper amount of Vitamin D and the immune system is working smoothly, the risks of disease and infection are significantly lowered. This vitamin also helps with high blood pressure, heart disease, and with depression, which leads to overeating.

How to Take Your Supplements during Your 3-Week Lipo Laser Program

Your Herbalogica supplements are radically different than any other supplements you have taken before. Herbalogica strives to keep their products as pure as possible – unlike a myriad of supplement companies that can allow for a large percentage of fillers in each bottle.

Due to the purity of the product you are receiving, it is essential you follow proper instruction on how to take your daily supplements.

Here are our recommendations:

- Place all your supplements in bags according to the time of day you will be taking them.
 - AM bag
 - PM Bag
- Always take your supplements with food in your stomach.
 - During Lemonade detox days, take with mixture in your stomach.
- Only take 3-4 supplements at a time and wait 30 minutes before taking more.
- Continue this process until all supplements are gone.
- Finish taking all supplements before 6:00pm.

Day 1

Date: ___ / ___ / ___

Only consume approved fruits and vegetables.

DAY 21 and Beyond

Once you have gone through a 3-Week Lipo Laser Program, you should be feeling like a completely new person. A new level of vitality and health will have been reached. Now you must decide how you will live to maintain this level of wellness, and even improve upon it. Use the following list to ensure lasting health:

- Body cleansing and detoxification — everyone should detoxify at least four times per year. We still live in a toxic society, and this becomes a cleansing lifestyle.
- Proper food choices — consist of foods that heal the body, rather than foods that destroy health.
- Exercise — at least 40 minutes per day. Alternate weight-bearing and cardiovascular.
- Learn to deal positively with stress.
- Listen to the body. The body will tell you what it needs and what it doesn't need.
- Become educated on how the body works.
- Live a positive, happy, healthy life.
- 100% nutrition — there will always be a need to supplement nutrients, as it is impossible to get complete nutrition by eating food sources as they are in today's world.
- Herbalogica recommends these supplements each day for a healthy body
 - Multivitamin / Multimineral
 - Antioxidant
 - Flax Seed Oil
 - Evening Primrose Oil
 - Vitamin D
 - Liquid Calcium
 - Digestive Enzyme
 - Herbalogica Nutritional Shake
- Eat twice as many veggies as fruits
- Eat a variety of foods and a rainbow of colors
- Fresh and organic produce is always best
- Have one Herbalogica Nutritional shake daily to replace a meal
- Take all recommended supplements – ask about specific supplementation for your particular needs
- If using salt, use Real Salt or Sea Salt
- DRINK WATER: You should be drinking half your weight in ounces – not tap water!
- Get to bed early and get 8 hours of sleep if possible
- No processed foods!
- No MSG and NO CHEMICALS
- 5-7 small meals throughout the day will keep your metabolism going
- Last meal of the day should be eaten before 6 pm
- Track calories, Women: 1000-1100 calories per day, Men: 1200-1300 calories per day

✓ LOVED IT!	✓ Didn't like it	

SOUPS

American Vegetable Soup	1 hr 10mins	Serves 6
<ul style="list-style-type: none"> ▪ 1 tbsp extra virgin olive oil ▪ 2 cups sliced leeks ▪ 1 sliced medium red onion ▪ 2 carrots, halved and cut 1/8 in rounds ▪ 1 medium green cabbage, chopped (8 cups) ▪ 1 tsp fresh thyme ▪ 7 cups boiling water 		
<ul style="list-style-type: none"> ▪ 1 tbsp low sodium organic chicken broth ▪ 3 tbsp lemon juice ▪ 2 peeled and chopped medium tomatoes ▪ Freshly ground pepper ▪ ½ cup celery ▪ ½ cup green beans ▪ ½ cup peas 		
<ol style="list-style-type: none"> 1. Heat oil, garlic, onion, and thyme and sauté until onion begins to soften (about 2 minutes) 2. Add carrots, celery, green beans, peas, and cabbage. Sauté and stir for 2 minutes. 3. Add water and bring to a boil. Stir in broth and tomato paste. Cover and bring to boil. Simmer for 35 to 40 minutes. 		
✓ LOVED IT!	✓ Didn't like it	

Creamy Celery Soup	30 min	Serves 4-5
<ul style="list-style-type: none"> ▪ 1 medium onion ▪ 1 medium celery stalk ▪ 1 medium garlic clove ▪ 1 tbsp olive oil ▪ 4 cups chopped vegetables, in $\frac{1}{2}$ to 1 inch pieces 	<ul style="list-style-type: none"> ▪ 5 cups low-sodium, organic vegetable broth ▪ Freshly ground pepper 	

1. Boil water
2. Chop onion and celery. Slice garlic into thin strips.
3. Heat oil, onion, garlic, and celery in a separate pot. Cook and stir for 1 minute on medium heat. Add vegetables and continue to cook for 1 minute.
4. Add boiling broth and bring back to a boil. Stir and reduce heat to medium. Cover and cook for 8-10 minutes. Simmer until vegetables are tender.
5. Pour soup into a bowl to cool.
6. Place $\frac{3}{4}$ of soup in blender and liquefy to a cream. Pour into original soup pot. Place remaining one-quarter of unblended soup in blender. Pulse-blend for 2 to 3 seconds, allowing mixture to remain lumpy and textured. Pour it into creamed portion in the original soup pot.
7. Place soup over medium heat. Gently reheat soup, taking care not to let it boil and stirring frequently. Add pepper to taste.

LOVED IT! Didn't like it

Happy Vegetable Soup	15 min	Serves 3-4
<ul style="list-style-type: none"> ▪ 1 small onion ▪ 2 green onions ▪ 2 celery stalks ▪ 2 carrots ▪ 1 zucchini ▪ 1 pressed garlic clove 	<ul style="list-style-type: none"> ▪ 2 green chard leaves ▪ 2 cups broccoli ▪ 1 tbsp extra virgin olive oil ▪ 6 cups low-sodium, organic vegetable broth ▪ $\frac{1}{2}$ cup minced fresh parsley 	

1. Cut vegetables (except chard and broccoli) into $\frac{1}{2}$ inch pieces.
2. Coarsely chop chard and cut broccoli into thin florets.
3. Sauté onion, green onion, celery, carrots, zucchini, and garlic in oil. Add hot broth then boil. Simmer for 5 minutes (covered)
4. Stir in parsley. Remove pot from heat and cover for two minutes

LOVED IT! Didn't like it

Vegetable Garden Soup	20 min	Serves 8
<ul style="list-style-type: none"> ▪ 6 cups low-sodium, organic vegetable broth ▪ $\frac{1}{2}$ tsp extra virgin olive oil ▪ 2 carrots, peeled and diced ▪ 1 large onion, diced ▪ 1 cup of chopped broccoli ▪ 4 Cloves of garlic, minced ▪ 1/2 cabbage, chopped 	<ul style="list-style-type: none"> ▪ 1/2 pound frozen green beans ▪ 2 tbsp tomato paste ▪ 1 tsp fresh basil ▪ 1 tsp fresh oregano ▪ 1 tsp sea salt ▪ 1 large zucchini, diced 	

1. Bring the broth to a boil
2. Put Extra-Virgin Olive Oil in Dutch oven and heat on MEDIUM HIGH.
3. Add the carrots, onion and garlic and cook for about 5 minutes.
4. Add all the remaining ingredients EXCEPT the zucchini and bring to a boil.
5. Cover, reduce the heat to MEDIUM and simmer for about 15 minutes or until the beans are tender.
6. Add the zucchini and cook until the zucchini is tender.
